On behalf of KSAM, KSAE, and KSBE, it is a great honor to invite you to “The 6th CIGR International Conference 2024”, to be held on May 19th – 23rd, 2024, at ICC JEJU, Jeju Island, Republic of Korea. With a total length of your visit of 5 days, from May 19th–23rd, 2024, all arrangements must be done by yourselves, including transport, hotel and meals.

In the 21st century, the era of the 4th industrial revolution, the CIGR has promoted the exchanges of agricultural information, seminars on the development of and utilization of technologies, discussions about mutual interests, and research on measures for future advancement. Climate change is of global significance because it adversely affects each country’s market economy through unpredictable natural disasters, resulting in political and social instability. In this global crisis, the agriculture industry plays a vital role in providing life-saving food for people. For the future lives of people worldwide, it is essential to create sustainable values of survival and advances.

The 6th CIGR International Conference theme is “Digital Agriculture (Feed the Future).” Dynamic thought leaders, scientists, and researchers will share and exchange information about state-of-the-art technology related to agricultural and biological engineering at this conference. In addition, this conference will provide an excellent opportunity for communication with all the participants from around the world, who are also global experts in agricultural and biological engineering. The program will consist of nine potential technical sessions, i.e., (1) novel technology and innovation in agricultural machines, (2) agricultural robotics and sensing technology, (3) land and water for climate agriculture, (4) agricultural structures and environment, (5) sustainable plant production, (6) artificial intelligence and data science, (7) machine vision system for agricultural processing, (8) food safety, processing and engineering, and (9) smart greenhouse and livestock farming.

Jeju stands as the symbolic island of peace on the Korean Peninsula, a true global treasure blending unique cultural and natural elements bestowed by nature. Jeju would be an excellent platform for exchanging valuable information and networking related to agricultural engineering research and industry.

Please kindly consider this letter as an official letter for your Korean Visa and travel formalities. If you have any questions, please do not hesitate to contact us at registration.cigr2024@planbgroup.org.

We look forward to having you at this conference in Jeju.

Sincerely yours,

KANGJIN LEE

Kangjin Lee, Ph.D.
Chairperson, CIGR 2024 Organizing Committee
President, Korean Society for Agricultural Machinery ('22 ~ '23)

Hosted by Korean Society for Agricultural Machinery (KSAM), The Korean Society for Agricultural Engineers (KSAE),
The Korean Society for Bio-Environment Control (KSBE)
Organized by CIGR 2024 Organizing Committee
Secretariat The PlanB Co., Ltd.
